

TAC Computer Enterprise CAD

The CAD has been updated to provide enhanced ease of use.

When a name is added to the CAD and the relation is set to ARA arrest the CAD automatically creates an arrest. Booking officers should always check for an existing arrest before creating a new arrest.

The CAD Call Screen now has Function buttons F1 through F12 that correspond the tab that they enable.

The screenshot shows the '1207498 Cad Call' window. The top section contains call details: Call Date (03/10/2013), Time Received (11:02:03), Call Status (UNA), Method Rec (T), Disp 1 (GJHG), Disp 2, OIC (GHJJ), and Call Number (1207498). Below this are fields for Caller Name (First, Middle, Last), Caller Phone, Run Card, and F Grid. The next row includes Caller No, Caller Street, Caller City, Suite, State, Call Loc, Page, and MABAS. The 'Common Name' field is populated with 'A FIRSTMART', and the Agency is set to a blue dropdown. Other fields include PD Zone Grid, Fzone (red), Alarm, and Disposition. The address section shows Street Number / Cross (641), Street Name (SCRANTON AVE), Building, Suite, City (ALLIANCE), and Zip (44601). Call Type and Fire Call Type are dropdowns, and Priority, Response, and POC are also dropdowns. A row of function buttons (F1-F12) is highlighted in yellow. Below this is a 'Remarks' section with a grid of tabs: Dispatch, Units, History, Names, Vehicle, Property, Reports, Warrant, Alerts, Call Info, Occupant 2, and Notified. A large text area for remarks is present. At the bottom right of the remarks area are buttons for 'Dual Remarks', 'Time Stamp', and 'Spell Check'. The bottom of the window features a row of action buttons: Complete, Save, Cancel, Print, MDT Send, Fire MDT, Map Addr, Map Cell, Get 911, Transfer, Req Aid, and Clone.

Tab stops for GIS and PD Zone have been enabled.

The Caller City now automatically displays the choice of City without pressing the lookup button.

In unit update changing status to TRF, Traffic Stop, will generate a traffic stop screen and positions the cursor the Plate field. Status is set to TRF Traffic Stop and Method Received is set to R for Radio.

The screenshot shows a software window titled "CAD Units Update". The window contains several input fields and a table of officer information.

In the unit screen changing status to OSC, On Scene, will generate a Call screen with the Status is set to OSC and Method Received is set to R for Radio.

When entering cross street the system will automatically prompt for the correct street spelling.

When a plate is entered the the vehicle section the history of the plate is automatically displayed

The screenshot shows a software interface with a top menu bar containing function keys F1 through F12. Below the menu is a tabbed interface with tabs for Remarks, Dispatch, Units 1, History, Names, Vehicle, Property, Reports, Warrants, Alerts, Call Info, Occupant, and Notified. The 'Vehicle' tab is active, and within it, the 'Vehicle History' sub-tab is selected. The main area contains several input fields: Plate (OLENMAN), State (OH), Type (PC), Make (NCIC), Model, Year, Style, Vin, Vehicle Color 1, Vehicle Color 2, and Date (03/10/2013). A 'Tow(s)' button is located to the right of the Date field. Below the input fields is a row of buttons: Unpaid Parking, Display Warrant, Display Alert, New, and Delete. At the bottom of the interface is a comprehensive toolbar with buttons for Complete, Save, Cancel, Print, MDT Send, Fire MDT, Map Addr, Map Cell, Get 911, Transfer, Req Aid, and Clone.

Activate the History Tab and press Go To display details of any selected call in history.

This screenshot shows the same software interface as above, but with the 'History' tab selected. The 'Vehicle History' sub-tab is active, displaying a table of call history. The table has the following columns: Inm, date, trc, code, dispo, loc1, loc2, and nar. The data rows are as follows:

Inm	date	trc	code	dispo	loc1	loc2	nar
HUMM	03/10/2013	00:48:48					
	03/09/2013	19:01:37	TRAFFIC STOP				
HUMM	03/09/2013	23:52:11					
	02/13/2013	10:58:42			314	E MAIN ST	

A 'Go To' button is highlighted in yellow to the right of the table. Below the table is a large empty green rectangular area. The bottom toolbar is identical to the first screenshot.

When Enter Person associated with a call, entering the SSN or Driver's License number will automatically fill screen with prior information.

History will display the history of that person based on SSN or Driver's License number. The Go button on the person history Tab displays the details of prior call history.

Pressing one of the NCIC button runs the person through LEADS by either SSN or Driver License number.

Person Information Form (F5):

Title	First Name	Middle Name	Last Name	Suffix	DOB	Relation		
SSN	Driver's Lic #	State	Lic Type	Hair	Eyes	Sex	Race	
Married	Age	Height	Weight	House #	Street Name	Apt	Municipality	State
Zip	Date Of Contact	Home Phone	Cell Phone	Plate	State	Type	Match Vehicle	

Buttons: Display Warrant, Display Alert, Add Caller, New, Delete

Depressing the ellipse button display recently ran plates with the most current on the top.

Select Person

First Name	Middle	Last	SSN	License
THOMAS	W	CRAVEN	[redacted]	RP9947

Buttons: Select, Exit

Depress Enter to Select Person Information to be imported to the Call screen.

When a police Incident report is assigned in CAD the Incident report will be automatically created when the last unit clears the call. Optionally (controlled by system config) the dispatch notes become the Incident Narrative.

When call modify is selected the current days and prior four days of calls are displayed. The cursor will me on the most current call.

The CAD is now configure to send updates to MDTs every time the dispatcher press save on the call screen until the unit are in the on scene status.

The Incident report has a grid view that display all selected records. Clicking on the column header will sort by the column. Clicking on the record

The screenshot shows the 'Incident' window with a grid view of incident records. The interface includes a header with fields for Incident #, Incident Type, Status, CAD Number, OIBRS Status, Records Status, Supervisor Status, and Admin Status. Below the header is a navigation bar with buttons for Admin, OIBRS 2, Narrative, Persons (4), Victims (1), Officers (6), Property, Vehicles (2), Case Manage, Investigative (3), Approval, K9, Digital Media, and Grid View. The main area contains a table with columns for Oca, End Date, Time, Loc1, Loc2, Apt, Municipal, and Zone. The table is sorted by Oca in descending order. A toolbar at the bottom contains various icons for navigation and actions, and the page number '1 of 28' is displayed in the bottom right corner.
